The "Świętokrzyskie – a Good Spot for Investment" Guide has been prepared under the "Innovation as a Pathway to the Future: Co-Operation of Self-Governments and Companies" Project.

The Project is financed from European Social Fund and National Funds, Integrated Regional Operational Programme, Action 2.6 "Regional Innovation Strategies and Know-How Transfer".

The Project's objective is innovative enhancement of the region and the country through foreign investment project support.

The Project has brought together representatives of the local self-government, institutions supporting regional innovative development, centres of academic education and entrepreneurs from the whole of Poland.

Ladies and Gentlemen,

Poland's oldest mountain range, picturesque natural reserves and landscape parks, open-minded and friendly people, as well as excellent conditions for business investment projects – all these are found in Świętokrzyskie Voivodeship.

Here, the past intermingles with the present. At Nowa Słupia, two-thousand-year-old methods of iron smelting can be watched in operation, while state-of-the-art technology is presented at the International Defence Industry Exhibition – one of Europe's largest events in its field, organised

by Kielce Trade Fairs (Targi Kielce). Kielce Trade Fairs is Poland's second largest exhibition centre, situated at the national and international crossroads. It is also a centre for business meetings, visited by Polish and foreign celebrities.

Świętokrzyskie land boasts investor-friendly self-governments with considerable economic potential, who know how to create a climate advantageous to new investment projects. There are also the constantly expanding Special Economic Zones, where investors will find favourable conditions for the start of their business operations. Certainly, an additional benefit of our region will be the airport which is being built at Obice near Kielce. A modern airport will undoubtedly facilitate quick communication with the whole world, which these days is a major criterion for foreign investors' choice of capital destination.

While you are here, let me invite you to visit the land of Świętokrzyskie. You can use our cycle paths and walking routes, as well as practising a variety of sports. Horseback-riding enthusiasts can use the Michałów, Borków and Kurozwęki horse studs. In the northern and eastern parts of the voivodeship, you can enjoy water sports. Pińczów and Masłów offer attractions for pilots and hang gliders. The region's highlight is the monastery complex with its Holy Rood shrine located at Święty Krzyż, which is celebrating a millennium of monastic life this year. The Opatów Collegiate Church is particularly impressive as well: it is one of Poland's most beautiful Romanesque churches; in Jędrzejów, the Przypkowski Family Museum holds Europe's largest collection of sundials.

I am convinced that a holiday in the lovely nooks and corners of our region will give you unforgettable memories. Here you will experience the helpful attitudes of local residents and the region's authorities.

I hope you will start many a fruitful contact in our region.

Grzegorz Banaś
Świętokrzyskie Voivode

Ladies and Gentlemen,

It is our honour and pleasure to introduce to you one of Poland's most beautiful and attractive regions.

A very convenient geographical location, costs of income which are more advantageous than in the neighbouring regions, and a variety of mineral resources make Świętokrzyskie Voivodeship a leading potential investment area. Thanks to rich deposits of raw materials, the building materials industry is developing here at a fast pace. Similarly, metal industry companies, glass and paper manufacturers and print shops have perceived good

opportunities for themselves. A favourable climate and rich soils enable successful operation of agricultural and food-processing companies. Due to the exquisite quality of local crops, our organic food products are widely appreciated.

The investment projects implemented over the last couple of years have brought significant changes to our voivodeship. We have new roads, waterworks and sewerage systems. There are new or modernised facilities for arts, sports, recreation, tourism and health services. The voivodeship boasts new stadiums, sports halls and other public buildings, such as schools, libraries or health centres.

Local institutions of higher education have also jumped at their chance for development and created modern teaching facilities. A significant task in the field of education and know-how will be the "e-świętokrzyskie" project whose aim is to provide the community with easy Internet access and enhance the voivodeship's computerisation.

The Kielce region's unique character springs from its picturesque qualities, unpolluted natural environment and numerous sights. These factors make our region excellent for tourists, both those who prefer active leisure pursuits and those seeking peace and quiet in the unspoilt beauties of nature. The abundance of scenic or otherwise interesting spots will give you many unforgettable memories.

Do allow me to invite potential investors to contact the local authorities, who are dedicated to encouraging an investor-friendly climate. I believe that we will be able to inspire your confidence which will result in long-lasting co-operation.

Let me cordially invite you to come and visit our hospitable Świętokrzyskie Voivodeship where you will experience the welcoming attitude of the local self-government and inhabitants. I am convinced that whoever visits us once will want to come back.

A handwritten signature in black ink, appearing to read 'Jarubas', with a large, stylized initial 'J'.

Adam Jarubas

Marshal of Świętokrzyskie Voivodeship

Poland

- In the heart of continental Europe
- Part of the Trans European Road Network
- Population of 250 million consumers within a 1000 km radius

Important for investors

38 million consumers driving 10% annual retail market growth

20 million young, highly educated, multilingual people

50% of the population under 35 years old

Over 2 million attending higher education

Loyal and hard working society

Stable consumption rates in households

Competitive business costs

Dynamic development of communications and telecommunications infrastructure

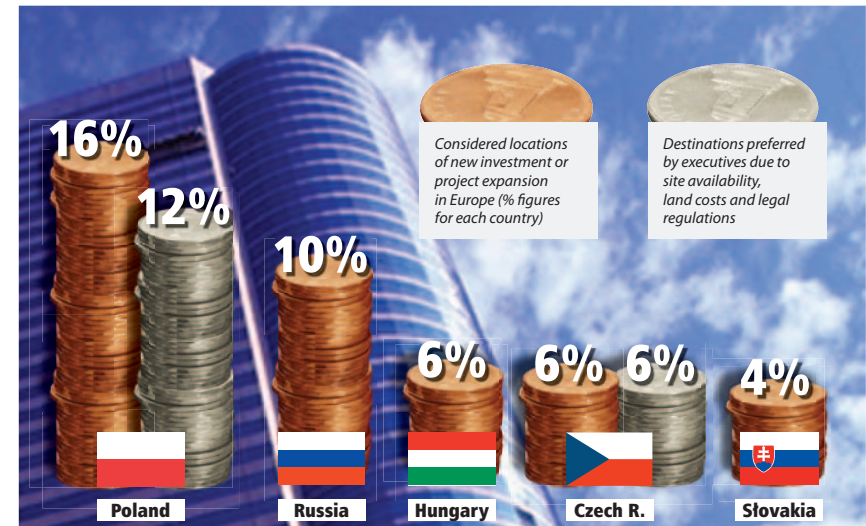

Poland's investment potential

GDP growth twice as high as in Western Europe (in 2006, Polish GDP rose by 5.8%, at the average of all 25 EU member states of 1.5%. In 2007, Poland's projected GDP growth shall amount to 4.5%, in Germany – 2.8%, the average of all EU states – 2.6%, and in the USA – 1.9%).

Ranked first in Europe's planned invested projects.

Ranked second in Europe in FDI confidence (according to the 2006 AT Kearney report).

Ranked fifth in top global direct investment destinations.

Source: "Emerging Economies Stake Their Claim" Ernst & Young 2005

Investment incentives in Poland

In Poland, depending on the investment project location, the investor can count on regional aid amounting to 30 to 50% of eligible investment costs. Aid may be granted in the following forms:

● CIT exemption in SEZs

Exemption from income tax is available in the case of investment project location in one of the fourteen Special Economic Zones. According to valid regulations, this form of aid will continue to exist until the year 2017. A company will not be obliged to pay CIT until the maximum aid level is reached. CIT rates in Poland are 19%.

● Aid funds towards employment of the jobless registered at poviats job centres

Aid from poviats job centres is granted pursuant to individual negotiations between the investor and the manager of a job centre. The market labour offers the following instruments:

- unemployed intervention works,
- subsidies to workplace equipment and upgrading of up to PLN 12,136,
- subsidies to accommodation costs of up to PLN 1,798,
- subsidies to commuting costs of up to PLN 1,798,
- unemployed training courses, according to the investor's requirements,
- vocational hands-on training for the unemployed under 27 years of age,
- single refund of social welfare contributions of up to PLN 2,697,
- free-of-charge consultancy and assistance in the recruitment process.

The above aid instruments are to be used at the discretion of poviats job centres and may be applied to unemployed persons who will subsequently be employed by the investor.

● Aid in the form of cash grant from the state budget

Under the financial aid system for large investment projects, implemented on the basis of the Ministers' Council's decision, there exists a possibility of aid being granted to projects of particular significance for economic development of Poland's priority sectors. These include motor, electronics and aircraft industries, biotechnology, modern services and research and development.

The fundamental criteria for granting financial aid to projects in the above sectors are the following: the number of generated workplaces (minimum of 250 new workplaces) and the volume of incurred capital outlay (minimum of EUR 40 million). The system does not assume "automatic" aid granting to all projects which meet the eligibility requirements. Each application is subject to individual assessment by the Polish Information and Foreign Investment Agency (Polska Agencja Informacji i Inwestycji Zagranicznych – PAIiIZ). Projects which receive the PAIiIZ approval as eligible for cash aid are assessed by the Interdepartmental Board for Foreign Investment. A decision is then taken by the Ministers' Council at the request of the Minister of Economy. The aid granted is subject to individual approval by the European Committee.

● Real estate tax exemption

Real estate tax exemption is available in the case of investment project location in a municipality which has passed an appropriate resolution, approved by the Office of Competition and Consumer Protection (Urząd Ochrony Konkurencji i Konsumentów – UOKiK). The period of time over which the exemption may be granted to the investor is usually calculated on the basis of the number of new workplaces which the company intends to generate.

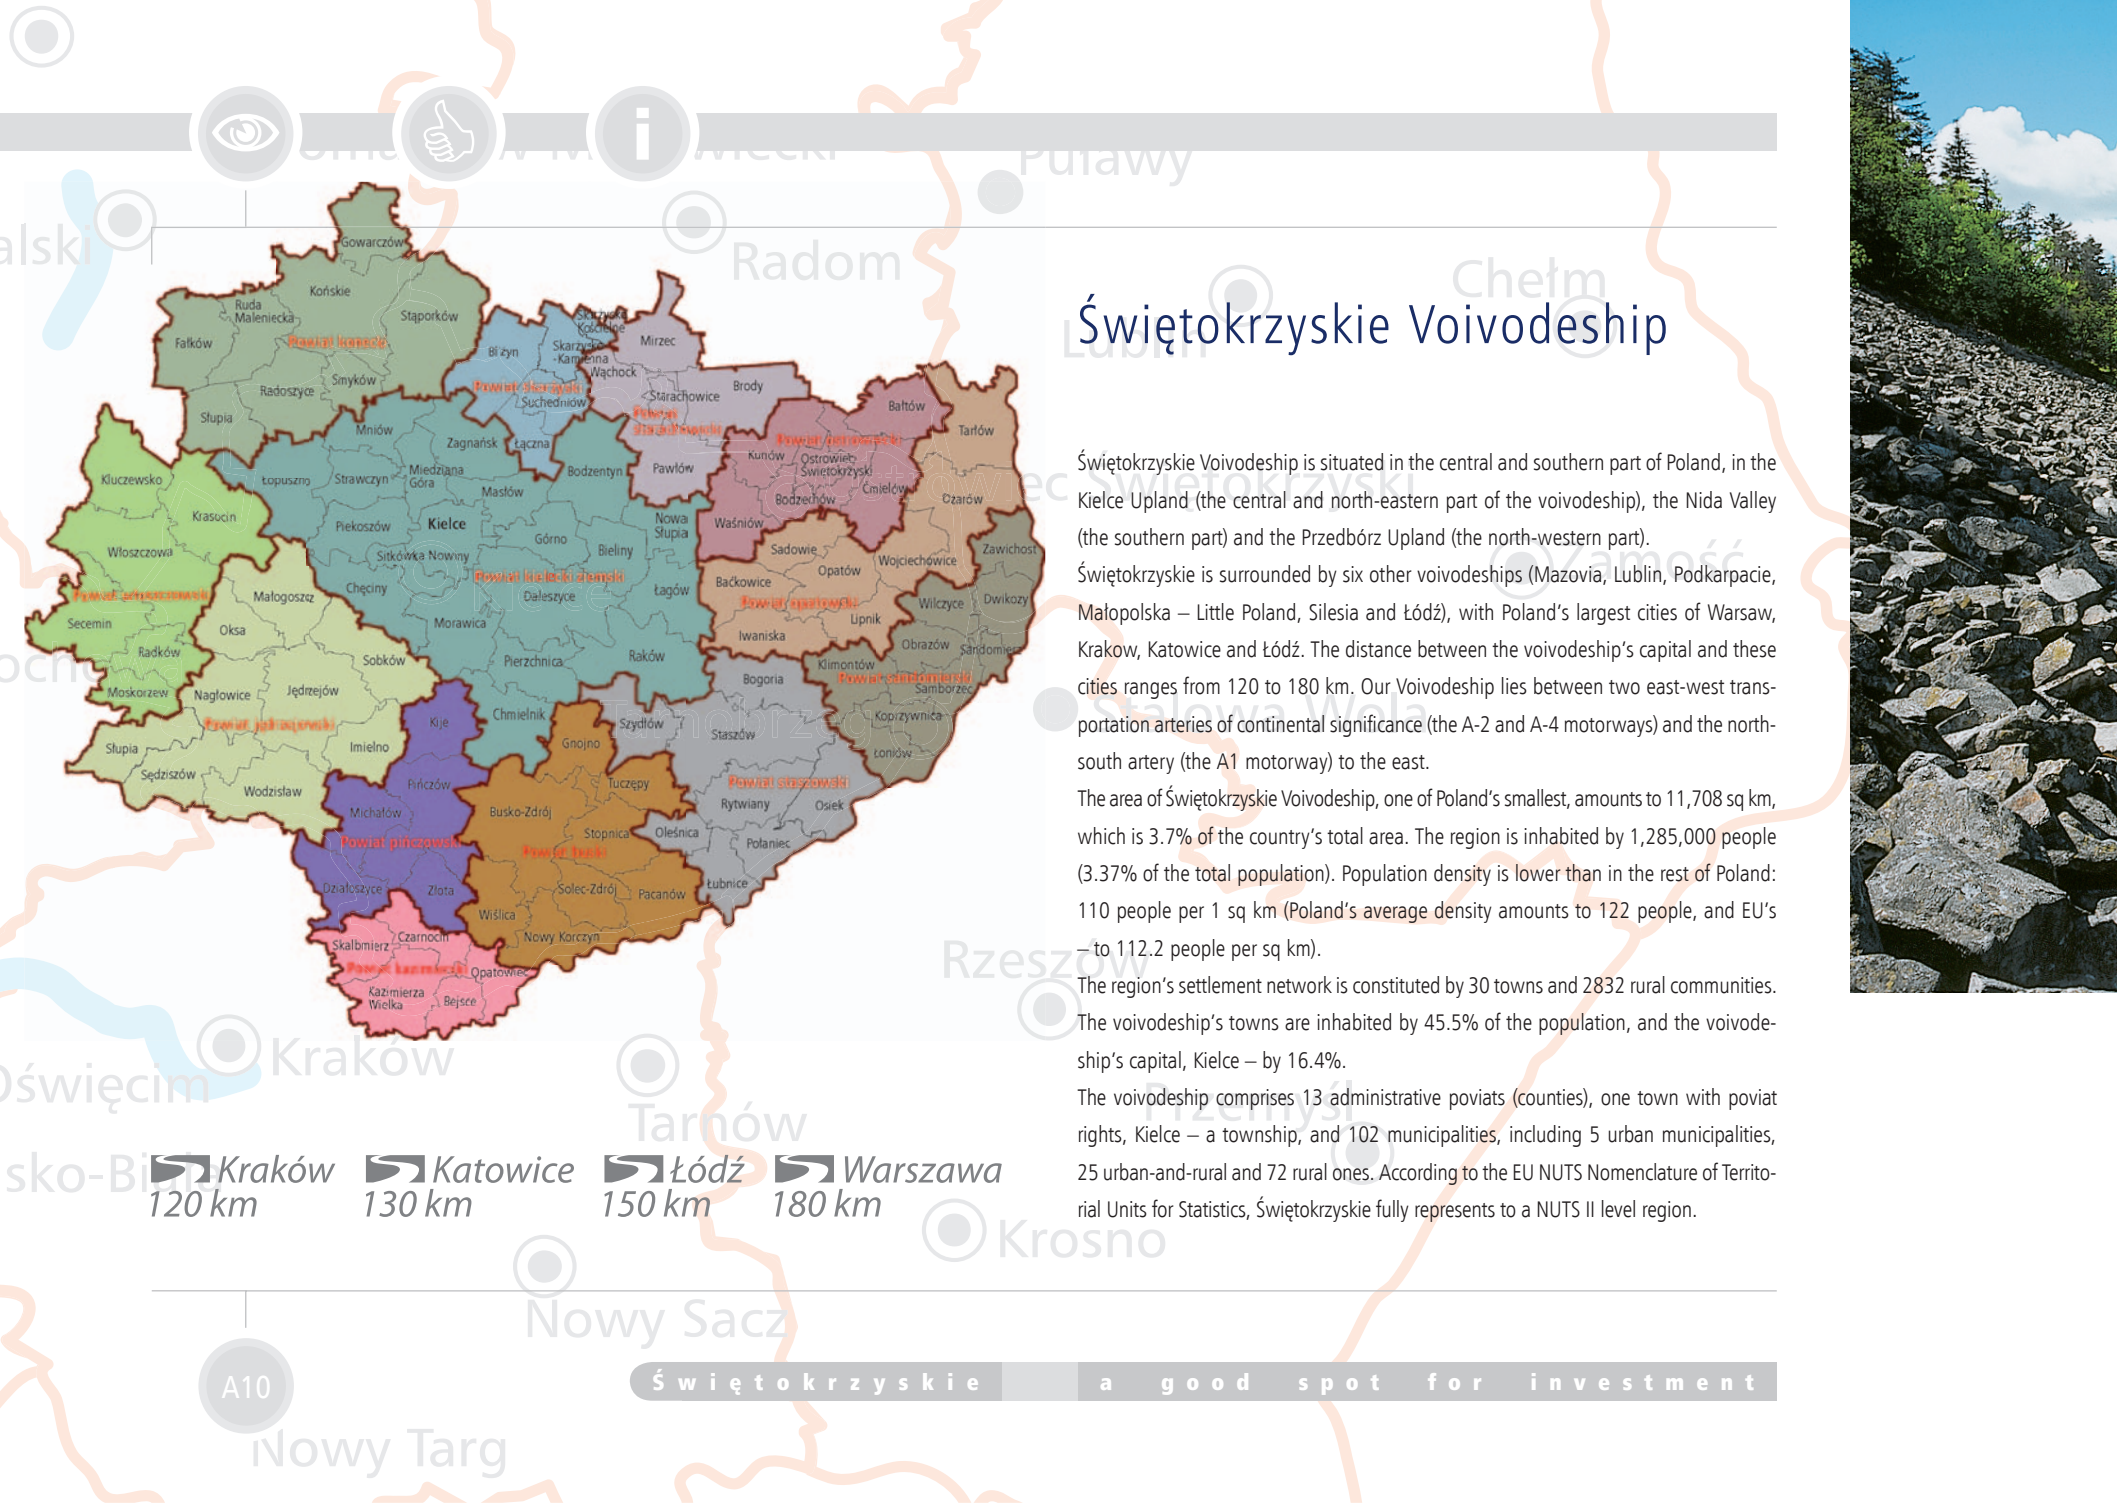

Real estate tax is paid by the real estate owner. Its yearly amount is calculated on the basis of the area of land, buildings and the value of other structures multiplied by tax rates as approved by the municipality for the given year.

Maximum real estate tax rates per m² in the year 2007 are as follows:

- on buildings and parts thereof used for business purposes – PLN 18.60,
- on land used for business purposes, regardless of classification in the land and building register – PLN 0.69, on other structures – 2% value thereof.

AID FROM THE EU In the years 2007-2013, Poland will become the largest beneficiary of EU funds (exceeding EUR 67 billion), a considerable part of which will be earmarked for entrepreneurs implementing new and innovative investment projects in our country.

Świętokrzyskie Voivodeship

Świętokrzyskie Voivodeship is situated in the central and southern part of Poland, in the Kielce Upland (the central and north-eastern part of the voivodeship), the Nida Valley (the southern part) and the Przedbórz Upland (the north-western part).

Świętokrzyskie is surrounded by six other voivodeships (Mazovia, Lublin, Podkarpacie, Małopolska – Little Poland, Silesia and Łódź), with Poland’s largest cities of Warsaw, Krakow, Katowice and Łódź. The distance between the voivodeship’s capital and these cities ranges from 120 to 180 km. Our Voivodeship lies between two east-west transportation arteries of continental significance (the A-2 and A-4 motorways) and the north-south artery (the A1 motorway) to the east.

The area of Świętokrzyskie Voivodeship, one of Poland’s smallest, amounts to 11,708 sq km, which is 3.7% of the country’s total area. The region is inhabited by 1,285,000 people (3.37% of the total population). Population density is lower than in the rest of Poland: 110 people per 1 sq km (Poland’s average density amounts to 122 people, and EU’s – to 112.2 people per sq km).

The region’s settlement network is constituted by 30 towns and 2832 rural communities. The voivodeship’s towns are inhabited by 45.5% of the population, and the voivodeship’s capital, Kielce – by 16.4%.

The voivodeship comprises 13 administrative poviats (counties), one town with poviat rights, Kielce – a township, and 102 municipalities, including 5 urban municipalities, 25 urban-and-rural and 72 rural ones. According to the EU NUTS Nomenclature of Territorial Units for Statistics, Świętokrzyskie fully represents to a NUTS II level region.

Świętokrzyskie a good spot for investment

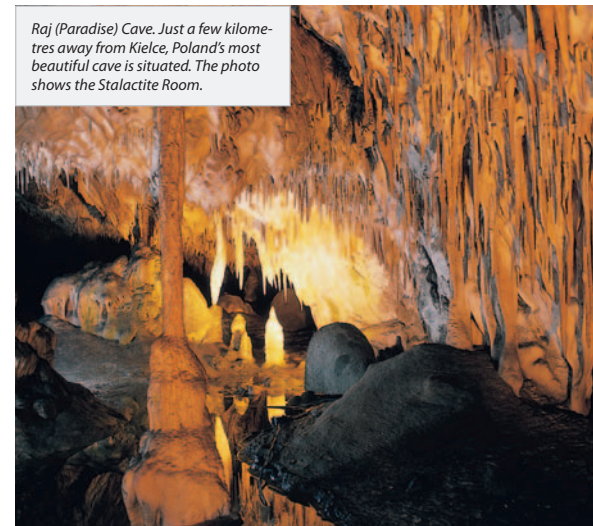

Slopes of Łysa Góra (Bald Mountain, 595 m. above sea level), second highest peak of the Świętokrzyskie Mountains. Rock rubbles, unique on the European scale, can be seen here. According to folk legends, Łysa Góra was the venue of witch meetings.

Świętokrzyskie region is one of Poland's environmentally cleanest areas. We have a very rich, varied and largely unique vegetation, including rare species of steppe, mountain and swamp flora, as well as central Poland's only halophyte community. Many rare and protected animal species live here, including some of the most endangered in Poland and in Europe. The area of Świętokrzyskie Voivodeship uses various forms of natural

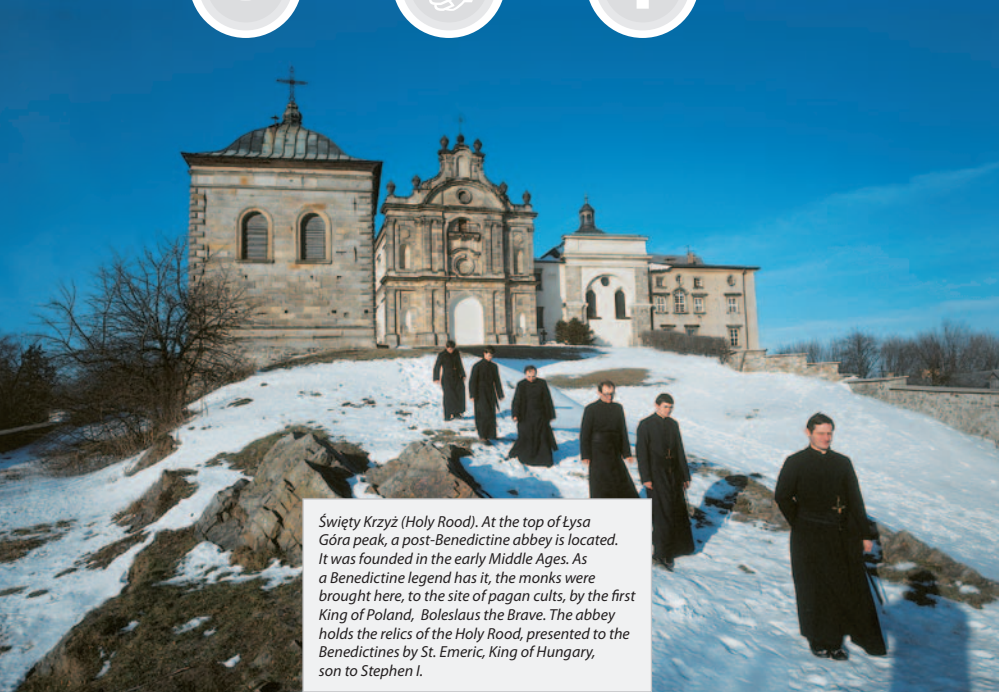

protection. The area of special natural quality, protected by the law, constitutes as much as 66% of the Voivodeship's total area (second to none in Poland). In the voivodeship, there are areas covered by the NATURA 2000 European ecological network (4 SACs – special areas of habitat conservation and 2 SPAs – special bird protection areas). The protected area system links to the protected areas of the neighbouring voivodeships. The high status of the region's natural environment in the international and domestic natural system is connected with the occurrence of significant elements of the ECONET ecological network. In terms of the quality of the natural environment, Świętokrzyskie ranks among the most attractive regions in Poland.

Zagnańsk. Bartek Oak-Tree, believed to be Poland's oldest living tree. According to various sources, it is between 700 and 1000 years old.

Raj (Paradise) Cave. Just a few kilometres away from Kielce, Poland's most beautiful cave is situated. The photo shows the Stalactite Room.

Święty Krzyż (Holy Rood). At the top of Łysa Góra peak, a post-Benedictine abbey is located. It was founded in the early Middle Ages. As a Benedictine legend has it, the monks were brought here, to the site of pagan cults, by the first King of Poland, Boleslaus the Brave. The abbey holds the relics of the Holy Rood, presented to the Benedictines by St. Emeric, King of Hungary, son to Stephen I.

Very valuable in cognitive and didactic terms is the region's culture. Świętokrzyskie region has played an important role in Poland's history. The voivodeship's history is well documented with numerous relics of material and non-material culture. Many of them are unique on the European or domestic scale, and others provide significant regional or local records. Particularly valuable are monuments of technology. Świętokrzyskie Voivodeship is a land of industry and agriculture, with a high concentration of traditional branches of industry related to metal manufacturing and processing, mineral resources mining and processing, as well as foodstuff production. The region is

Kielce. Cathedral hill with adjacent parks. Grand Baroque cathedral and palace, which used to be the seat of Krakow bishops.

very clearly divided into the industrial north and the agricultural south, which affords a base for organic food production.

The majority of towns, which provide a concentration of workplaces for the voivodeship, are concentrated in the area of the Old Polish Industrial Zone. It has grand tradition related to machine industry and metallurgy, as well as lime, cement and aggregate production.

The south-eastern part of the Voivodeship is generally agricultural, which is connected with the good rendzina soils, based on carbonate chalk rock and the loess soils of the Kielce-Sandomierz Upland.

Chęciny. Ruins of a medieval castle, situated on Góra Zamkowa (Castle Hill), 367 m). Built at the turn of the 14th century, the castle held rallies of knights and dignitaries. It was also used as a royal treasure house and prison. In 1554, Queen Bona Sforza, wife to King Sigismund the Old, stayed here. When she was leaving Chęciny, her belongings were carried in 24 wagons drawn by 140 horses.

Kielce. Homo Homini Monument, erected to commemorate the victims of September 11, 2001 terrorist attacks on the World Trade Center and elsewhere.

Kielce. Kadzielnia Amphitheatre. A former stone quarry, today it hosts open-air events and largest concerts.

People and work

The total number of employees at the end of the year 2005 in Świętokrzyskie Voivodeship amounted to 434,831, with 143,976 persons working in agriculture, 78,561 in industry, 60,879 in commerce, 30,737 in education, 25,516 in health care, 20,410 in transport and communications, and 18,082 in construction. According to statistics, average gross monthly remuneration in the first three quarters of the year 2006 in the enterprise sector amounted to PLN 2,347.33 in industry, and in construction – to PLN 1,841.09.

Tendencies towards change in the employment structure of our voivodeship come close to national trends. The employment rates in the services sector have been consistently on the rise, while the percentage rate of employment in the industry and construction sectors is on the decrease.

The largest drop in employment rates in the years 2000–2005 occurred mostly in industrial poviats, where the processes of enterprise privatisation and restructuring of a variety of industrial branches resulted in redundancies. In 2005, the highest unemployment rates were noted in the following poviats: Skarżysko (31.5%), Końskie (30.1%), Kielce (27.2%) and Ostrowiec (26.5%). The lowest unemployment was found in Busko (12.2%), Kazimierza (12.8%) and Pińczów (15.2%) poviats.

The unemployment rate in the voivodeship (as at December 30, 2006) amounted to 17.8%, which corresponded to 99,400 unemployed.

Kielce. Sienkiewicza street – the town's high street.

Kielce. Stadium of Kolporter Korona Kielce Football Club – Poland's most state-of-the-art sports stadium.

Kielce University of Technology. Main fields of study: construction, electrical engineering, information technology, environmental engineering, mechatronics and machine building, management and marketing.

Świętokrzyskie. The voivodeship boasts over ten institutions of higher education, the largest and most renowned being the Jan Kochanowski Pedagogical University and Kielce University of Technology.

Jan Kochanowski Pedagogical University. Main fields of study: information technology, library science, biology, chemistry, economics, physiotherapy, physics, mathematics, nursing, management and marketing, language studies (English, German and Slavic).

In Świętokrzyskie, there are 14 institutions of academic education, representing a variety of educational profiles. In the academic year 2004/2005, there were 65,134 students in the region, including 23,200 full-time students. The number of students in academic education per 10,000 inhabitants amounts to 502.5 which puts Świętokrzyskie in the fifth place in Poland. There are 2027 academic staff in full-time employment (2004/05). Nearly 58% students are students of state institutions: The Kielce University of Technology (15%) and The Jan Kochanowski Pedagogical University (43%).

Busko Zdrój. Marconi Sanatorium, the region's flagship spa centre. Busko and the nearby Solec Zdrój are famous for their medicinal brine waters in Poland and abroad.

Kielce. Ski slope on Telegraf Peak. The Świętokrzyskie Mts. are Poland's northernmost spot which offers natural conditions for practising winter sports.

In the whole of Poland, Świętokrzyskie Voivodeship comes first in terms of the number of health clinics per 100,000 inhabitants. There are 20.2 doctors per 10,000 inhabitants, with the national average of 22.4. In terms of the number of hospital beds, our voivodeship takes the eleventh place in the country (in 2002, 4.6 per 1,000 inhabitants; in 1995; 4.8).

The centre of spa treatment is located in the Busko powiat: in Busko-Zdrój and Solec-Zdrój. The largest spa potential is centred in Busko-Zdrój, whose sanatoriums cater for over 2,000 patients. In the high summer season, ca. 3,500 patients are treated in Busko simultaneously, and outside the season – ca. 2,700. Over 50,000 patients are treated in Busko yearly (the total number of in- and outpatients).

Busko Zdrój. Cryogenics chamber in a Busko sanatorium

Świętokrzyskie. The region has over 25 hospitals, including modern facilities specialising in cancer and heart disease treatment.

Important for investors

Age structure of the population enables the securing of human resources for long-term economic needs.

Dynamic development of educational institutions at various levels.

Increasing numbers of university-educated inhabitants.

Easy access to basic health care.
Cancer and heart disease treatment facilities.

Large numbers of courses offered by academic institutions and geared towards modern fields of know-how such as management, IT, physiotherapy, tourism studies, etc.

Existing and continually increasing potential of qualified personnel for industry and other branches of market economy, educated at the region's academic institutions.

Large numbers of learners, students and those improving their qualifications.

Increase in the number of independent academic staff who received their doctoral or post-doctoral degrees while working at academic institutions of Świętokrzyskie Voivodeship.

Rich resources of medicinal mineral water (containing sulphate, sulphide, hydrocarbonate, chloride, bromide and iodide ions) as well as peat baths in Busko-Zdrój and Solec Zdrój.

Increase in qualifications of management personnel and the numbers of specialists employed in companies.

Well-developed network of natural medicine centres, sanatoriums, spa hospitals, holiday and treatment centres, boarding houses and private accommodation in health resorts, complete with highly qualified medical and auxiliary personnel.

Infrastructure

In the year 2004, there were ca. 103.6 km of hard-surfaced roads per 100 sq km of voivodeship area, which places us among Poland's leaders.

The Świętokrzyskie road network is 12,129 km long, out of which the length of national road amounts to 752 km, but dual carriageways account for 48 km only. No motorways run through the voivodeship.

In terms of railway network density, the region ranks somewhat below the national average (6.0 km/100 sq km). Świętokrzyskie Voivodeship is crossed by 10 railway lines of total length of 724 km, out of which there are 610 km of national lines and 114 km of local lines. For the voivodeship, the most important is the Warsaw – Krakow line No. 8 which caters for passenger and cargo traffic and enables a connection with Warsaw and the northern part of Poland, as well as southern voivodeships such as Małopolskie (Little Poland), Śląskie (Silesia) and Podkarpackie (Sub-Carpathia). It has particular significance for transportation of cargo, e.g. it is used to supply coal to power plants at Połaniec and Kozienice, as well as transporting natural resources, cement and lime from our voivodeship.

Air transport is becoming increasingly important for the strengthening of the investment and tourism potential of our voivodeship. At Masłów, 8.5 km away from the city centre of Kielce, an airfield of total area of 72 ha is located. The Masłów airfield is now capable of receiving only small and medium executive and sports aircraft. The authorities of Kielce have taken the initiative to build a new airfield, which is to function as a multi-purpose regional airport. Once the new regional airport has been built, the Masłów

Świętokrzyskie. The region's main artery, the national No. 7 road, will be a dual carriageway by 2011.

airfield will preserve its up-till-now function catering for charter, business, executive or rescue flights. The new airport, in turn, which is planned to be built, will enable round-the-clock services for domestic and international short- and medium-distance flights. The construction of the Kielce Airport has found its way to the indicative list of the Voivodeship's Regional Operational Programme for the years 2007-2013.

Świętokrzyskie has one of Poland's largest, coal-fired, conventional block power plant at Połaniec. This power plant contributes considerably to securing the country's power needs. Świętokrzyskie region is characterised by a relatively low electrical power consumption, lower than the national average (ca. 1912 kWh/user). Low voltage lines constitute a large proportion of all power lines in the voivodeship. These lines have been in use for a prolonged period of time and require considerable capital outlay to be modern-

Important for investors

Advantageous spatial town organisation,
good-sized towns.

Spatially efficient intraregional communications system.

Perfect opportunities for development of tourism, agri-
tourism and organic foodstuff production.

High density of the region's local road network.

Demand for investment in municipal and urban
infrastructure.

Demand for investment in infrastructure which would
foster the use of natural heritage.

Large area of protected land and relatively low
industrialisation, which provides large, ecologically
unpolluted areas.

Świętokrzyskie. The voivodeship is one of the country's most major electricity providers. Electricity is distributed by Electricity Works of the Radom and Kielce District (Zakłady Energetyczne Okręgu Radomsko-Kieleckiego S.A.)

ised. Re-electrification of the voivodeship's area is necessary and must include not only the renovation of the old power infrastructure in order to reduce transmission losses and improve the quality of power supply, but also power supply to new investment areas to be developed for residential housing and business purposes.

In the year 2005, in Świętokrzyskie Voivodeship, there were 161,600 users of network gas. The length of the gas distribution network in our voivodeship amounted to 3,624.4 km. The voivodeship is supplied with gas through high-pressure pipelines located in its northern and eastern parts. The western and southern parts are not at present fitted with any gas distribution network. More than half the municipalities are not currently covered by supplies of network gas.

Economy

The fundamental mineral resources include, in particular, the deposits of gypsum rock (ranked among the richest in Europe). Świętokrzyskie heads the voivodeship league in terms of gypsum rock mining output (100% of domestic output), gypsum binder (88.4%), brimstone (71.7%), production of lime (38.1%), cement (32%) and regular broken mineral aggregate (24.8%).

Representative of our voivodeship are also metallurgy, machine and precision industries, particularly in areas of manufacturing casts, pipes, fittings, rolling ball bearings and central heating boilers. Steel and foundry products are also made here (Ostrowiec Świętokrzyski ironworks). A significant role is played by the food industry: it accounts for over 16% of the voivodeship's industrial sales. This branch is dominated by medium-sized and large private companies. The most dynamically developing are meat, dairy, milling, confectionery and greengrocery industries. Moreover, the printing industry and press distribution services play an important part.

Świętokrzyskie. The region's basic resources are the minerals used for the production of building materials such as cement and plaster.

„Morawica” Limestone Mine

The construction industry gives Świętokrzyskie a significant opportunity for social and economic advancement. The mineral resources found in the region (north of Kielce and in the south, in the Nida Valley) provide the basis for the development of the mineral industry, represented by well-known companies such as Dyckerhoff Cement Plant, Truskawica Lime Plant (Zakłady Przemysłu Wapienniczego "Truskawica" S.A.), Lafarge Cement Polska, Dolina Nidy Plaster Plant (Zakłady Przemysłu Gipsowego "Dolina Nidy" S.A.), Nida-Gips Ltd. ("NIDA-GIPS" Sp. z o.o.), Ożarów Cement Plant (Cementownia "Ożarów" S.A.), or Morawica Limestone Mine (Kopalnia Wapienia "MORAWICA"). The

Trzuskawica Lime Plant

Dyckerhoff Cement Plant

voivodeship's capital is home to large, renowned private building companies such as Echo Investment S.A., Mitex S.A., Dorbud S.A., or Kielce Bridge Company (Kieleckie Przedsiębiorstwo Robót Mostowych S.A.).

The region also has the Świętokrzyskie Casting and Co-operation Zone, based on the tradition of the Old Polish Industrial Zone and the pre-war Central Industrial Region. The companies co-operating within the casting cluster are mainly foundries, mechanical processing plants, heat processing plants and galvanising plants. The companies associated under the Świętokrzyskie Casting and Co-operation Zone undertake operations aimed

at revitalisation of their properties as well as implementation of modern techniques and technologies, which places this branch of industry among the most progressive and innovation-oriented in the regional economy.

At the end of 2006, 106,312 businesses were registered in Świętokrzyskie (including 85,652 self-employed individuals). These numbers continue to grow. A large majority of companies are located in towns. The enterprise indicator (measured by the number of companies per 10,000 inhabitants) amounts to 799 in our voivodeship, with the national average amounting to 937. In the REGON business register, the largest propor-

Kielce. A brewing vat at Belgia Brewery. Thanks to this company, the town has become famous for its beer. Fruit-flavoured beers are the most renowned brands, particularly popular with female customers.

this field. This is well worth considering, in view of the rising demand for building products and services, resulting from enormous infrastructure projects implemented in Poland as well as Poland's preparations for the 2012 European Football Championship.

The electrical machinery industry in our voivodeship is characterised by low efficiency and outdated production structure. This provides a good chance to foreign companies with modern technologies, intent on rapid increase in production potential. Favourable prospects for development and investment are offered by the food industry which uses the locally available agricultural produce. The production of organic foodstuffs is an important niche in the region's economic potential.

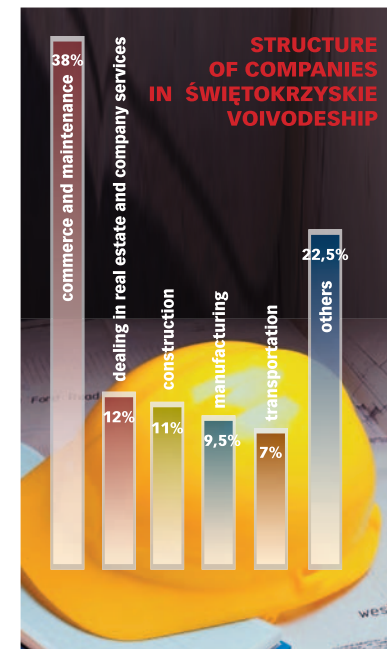

The entrepreneurs of Świętokrzyskie Voivodeship may obtain support from many institutions of the business environment. These are training and consulting centres in Kielce: the Staropolska Chamber of Industry and Commerce (Staropolska Izba Przemysłowo-

tion is taken by the commerce and maintenance sector – 38.05%. Next come estate and company services – at 12.2%, building – 11.03%, production – 9.52% and transportation – 7.05%.

An opportunity for development of Świętokrzyskie Voivodeship is provided by the building services industry, including refurbishment, renovation and finishing services. The region offers unique conditions for investing and running business operations in

Handlowa) and the Employers' Association Forum (Stowarzyszenie Forum Pracodawców), in Końskie (the Końskie Association for the Promotion of Entrepreneurship – Koneckie Stowarzyszenie Wspierania Przedsiębiorczości), and in Sandomierz (the Centre for Promotion and Support of Entrepreneurship in Agriculture – Ośrodek Promowania i Wspierania Przedsiębiorczości Rolnej).

The most important function is fulfilled by the Staropolska Chamber of Industry and Commerce together with its close co-operating agencies: the Centre for Business Support, Info-Data Bureau for Economic Promotion and Information (Biuro Promocji i Informacji Gospodarczej "Info-Data"), the Chamber of Craftsmen and Entrepreneurs (Izba Rzemieślników i Przedsiębiorców), the Association of Private Transportation and Services (Zrzeszenie Prywatnego Transportu i Usług), the Voivodeship Branch of the Poland-East Co-Operative Association (Stowarzyszenie Współpracy Polska-Wschód Oddział Wojewódzki), the Polish-American Club for Entrepreneurship at the Foundation in Support of Local Democracy (Polsko-Amerykański Klub Przedsiębiorczości przy Fundacji Rozwoju Demokracji Lokalnej) as well as the Starachowice Association for Local Initiative (Starachowickie Stowarzyszenie Inicjatyw Lokalnych). The most frequently

offered services include legal and economic consultancy, particularly for the SME sector, as well as provision of training sessions. The above institutions perform the function of representatives of entrepreneurs' interests before regional and central authorities by establishing their agencies and co-operating with consumer bodies. The Staropolska Chamber of Industry and Commerce is part of a network of ca. 180 regional business-supporting centres – the National Services System for SMEs. The role of the Staropolska Chamber of Industry and Commerce in the shaping of the voivodeship's competitiveness is further accentuated by the fact that it operates as the so-called Regional Financing Institution, i.e. a partner of the Polish Agency for Enterprise Development in the implementation of the sectoral policy, aimed at the SMEs of the region.

A considerable, and still rising, role in the promotion of enterprise is played by the Świętokrzyskie Regional Development Agency (Świętokrzyska Agencja Rozwoju Regionu – ŚARR), whose mission is to increase the region's economic potential through supporting the SME sector. In order to implement its tasks, this institution closely co-operates with self-government units of the voivodeship. The ŚARR provides training sessions as well as marketing and consultancy services in the field of business operations and ownership transformation.

The region also has a branch of the Business Centre Club, the Foundation in Support of Local Democracy, Employers' Forum and others. These leading institutions of the business environment of the voivodeship operate jointly in an organisation called the Economic Forum of Świętokrzyskie Voivodeship.

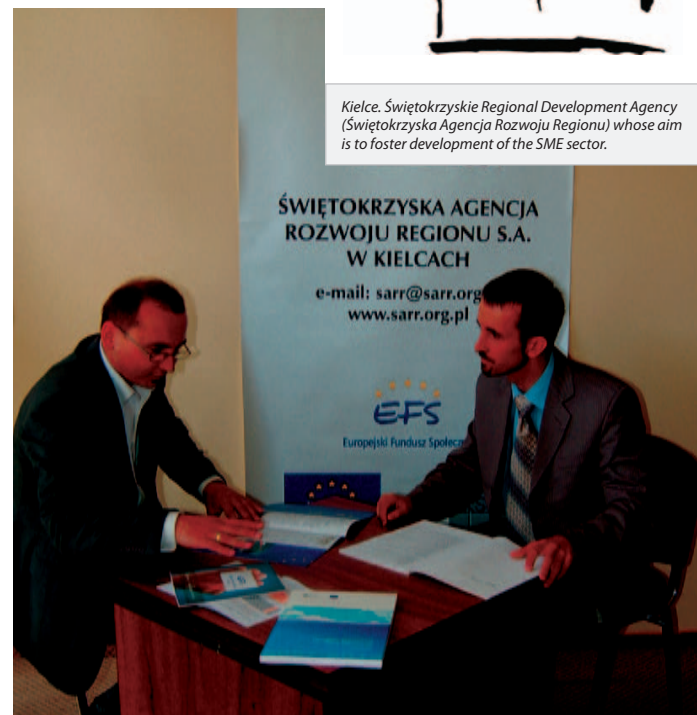

Since 2002, the Świętokrzyskie Centre for Innovation and Technology Transfer has been in operation, whose mission is to support local entrepreneurship through consultancy and training, technology transfer, financial services, certification, promotion and advertising, and in particular – through close co-operation between companies and research institutions.

Kielce. Kolporter S.A.

Kielce. Świętokrzyskie Regional Development Agency (Świętokrzyska Agencja Rozwoju Regionu) whose aim is to foster development of the SME sector.

Kielce. Kielce Trade Fairs (Targi Kielce) is Poland's second largest exhibition centre (after Poznań Tradeshows). Every year, the exhibition halls hold several tens of events. The majority of these attracts large numbers of Kielce residents.

Kielce Trade Fairs (Targi Kielce), a leading promotional and commercial institution of the region, has also had its significant share in increasing the voivodeship's competitiveness. Kielce Trade Fairs comes second, right behind the Poznań International Tradeshows – Poland's largest exhibition centre (in terms of the area and numbers of exhibitors). As Poland's only trade fair centre, Targi Kielce boasts a special display area for functional presentation of all kinds of equipment.

Kielce. As Poland's only trade fair centre, Targi Kielce has a special display area for functional presentation of building, road-building or military equipment.

Kielce. PLASTPOL International Fair of Plastics Processing.

The institutions of the business environment are shaping a very friendly economic climate for companies operating therein. They can be helpful to foreign investors both at initial stages of investment project preparation, and subsequently – while running or developing production and/or services.

Important for investors

Clear economic disposition and traditions of respective parts of the voivodeship, which facilitate decisions concerning investment project location.

Well-developed business infrastructure, including financial institutions, in Kielce and other major towns of the region.

Richness and variety of mineral deposits, and significance of the exploited deposits for the voivodeship and state economy.

Tradition and expertise of SMEs in the construction sector. Opportunity for further development of the building materials industry, particularly in unique industries.

Potential and expertise of Targi Kielce and other institutions of the business environment.

Considerable potential of foodstuff production companies. Potential for organic foodstuffs production.

Social base for business operations.

Well-developed network of medical and spa centres, holiday resorts, hotels and boarding houses. Rich springs of mineral medicinal waters.

Numerous qualified personnel for industry and other branches of economy. Large resources of qualified building personnel.

Dynamic advancement of the services sector, including tourism. Growing demand for company-oriented services.

Established reputation of the region's building companies. Large numbers of serious developers operating in the regional and national market, co-operating with local partners. Opportunity to work in a specialised environment – a natural cluster of building companies.

Business

In Świętokrzyskie Voivodeship, industrial estates are available in two Special Economic Zones in Starachowice and in Tarnobrzeg.

The Starachowice SEZ in Świętokrzyskie Voivodeship covers 286 ha, located in the towns of Końskie, Ostrowiec Świętokrzyski, Skarżysko-Kamienna and Suchedniów, and the municipality of Morawica. The Tarnobrzeg SEZ in Świętokrzyskie Voivodeship covers 97 ha, located in the municipalities of Polaniec, Staszów and Tuczępy. As a result of SEZ operations in these zones, by the end of 2006, 58 business permits were issued, which was linked to the investment of PLN 330 million and creation of 3517 new workplaces.

In the very same year 2006, 15 permits were granted to entrepreneurs who will jointly invest PLN 77.7 million and create 421 workplaces. In terms of the number of new workplaces, the most significant is the investment project of IRB Sp. z o.o. – 70 people, and in terms of capital outlay volume – that of Alpol Gips Sp. z o.o. – PLN 18 million.

In Świętokrzyskie Voivodeship, two loan funds are in operation, financially supported by EU funds, available from: - Foundation for the Development of Pierzchnica Region at Pierzchnica; - Końskie Association for the Promotion of Entrepreneurship in Końskie. In the voivodeship, we also have the FUNDSTAR Credit Guarantee and Financial Support Fund in Starachowice.

According to the official data of the Polish Central Statistical Office (GUS; as at September 30, 2006), in Świętokrzyskie Voivodeship 105,550 companies were registered. Out of these, 522 were foreign capital companies. Some of the foreign investors in our voivodeship are:

ZPW Truskawica S.A.

Truskawica Lime Plant (Zakłady Przemysłu Wapienniczego „Truskawica” S.A.) has been operating in the market for over 35 years and is heir to a 19th-century lime plant. It is a major, renowned manufacturer of high-quality materials for building, road-building, metallurgy and many other industries.

On February 12, 2002, upon privatisation, the Company became part of the international Cement Roadstone Holding (CRH) group. In the same year, our Company purchased 100% of shares in the Kujawy Wapno Sp. z o.o. plant at Bielawy and became Poland's largest manufacturer of lime products.

Lafarge Cement Polska S.A. – Malogoszcz Cement Plant

Malogoszcz Cement Plant is located at Malogoszcz, 35 km south-west of Kielce. The cement plant is one of the largest production plants in the region, and is equipped with three lines for dry-process production of clinker and four cement production lines. Annual production capacity amounts to 1.7 million tons of cement.

The cement plant makes use of its own limestone deposits and Jurassic marl from an open pit mine 1 km away. There are 14 silos, each of 5,000 ton capacity. The plant boasts a state-of-the-art packing and palletisation system, four car terminals for bulk cement loading, complete with one railway and motor car terminal. The range of Malogoszcz Cement Plant products includes a wide variety of Portland cements, Portland cements with mineral admixtures, and blast-furnace cement.

Electrabel – Połaniec

Electrabel is part of SUEZ, an international industry and services group, working in areas of energy engineering and the environment.

Electrabel is the front-runners in the energy sector in the Benelux market, with power generating facilities in the whole of Europe currently exceeding 29,000 MW.

In 2000, Electrabel, SUEZ Group, began its operations in Poland and is active in the fields of electricity generation, sales and trading. The power plant at Połaniec is Poland's fifth largest power provider, the largest in south-eastern Poland. It is located in Świętokrzyskie Voivodeship, on the Vistula river, near Połaniec, about 100 km away from Krakow. The annual production volume of the power plant approximates 5 TWh. Moreover, the power plant offers systemic services to the benefit of the National Energy System in areas of ARCM power control system, primary control, ARNE wattless power control system, power plant independent operation, and below-minimum operation on basic fuel. The power plant also generates heat energy, ash, gypsum and ash-and-slag for road-building and construction industry.

Pilkington – Sandomierz

Pilkington plc is one of the world's leading manufacturers of plate glass as well as glass products for the building and automotive industries and technical applications. The Company's total turnover exceeds \$ 4 billion, and its agencies in 25 countries are located in four continents. Currently, Pilkington employs ca. 24,000 people. Pilkington is one of the leading British investors in Poland, with over 1,400 people employed in three companies: Pilkington Polska, Pilkington IGP and Pilkington Automotive Poland.

Pilkington has been present in the Polish market for over ten years, supplying mainly glass for the building and automotive industries. The float production process, the world's most modern technology, enables the manufacture of high-quality plate glass. During the past decade, the company has become one of Poland's most active glass manufacturers with a significant share in the market. Pilkington Polska currently employs over 200 people.

Important for investors

Well-developed academic base in technology.

Considerable potential of qualified industrial personnel.

Poland's only Centre for Laser Technologies (Kielce University of Technology).

Development of Świętokrzyskie Centre for Innovation and Technology Transfer.

Development of the SME sector on the basis of new technology transfer and links between science and economy.

Formation of Academic Enterprise Incubator.

BROWAR BELGIA

Industry: beer brewing

Vision of development

The Regional Innovation Strategy (RIS) for Świętokrzyskie Voivodeship is determined by a vision of sustainable development, according to the following eight principles:

1. Reinforcing the co-operation, i.e. stronger structural and procedural bonds between groups such as administration, public agencies, investors, R&D, etc.
2. Promotion of increased participation and exchange of expertise of all partners in the innovation process.
3. Support of subsidiariness at local/regional level
4. Transparent management of sustainable innovation-based development
5. Making small but visible steps in the right direction
6. Transfer from "artificially linked" to integrated attempts at policy co-ordination in order to employ synergy and overcome economic, environmental and social inequalities.
7. Approval of long-term view for the effects of programmes and projects.
8. Formulating the objectives of "sustainability" depending on changing needs.

The RIS is part of the actions conducted by the Office of the Marshal of Świętokrzyskie Voivodeship, aimed at the implementation of one of the main goals of the Development Strategy for Świętokrzyskie Voivodeship until the year 2020, i.e. "the development of entrepreneurship based on the implementation of a complex programme for innovation increase". The implementation of this goal will be achieved through the following:

- mobilisation of local workforce and capital (human potential, natural resources, infrastructure and other technical resources, financial resources);

Kielce. The Regional Parliament of Świętokrzyskie Voivodeship. Members appoint the Marshal and the Voivodeship Board, who decide on plans for regional development and are accountable for their implementation.

- development of business environment institutions such as economic chambers, associations, agencies for local development, loan and guarantee funds, venture capital, marketing agencies, training and business consultancy institutions;
- adjustment of the region's offices, institutions and organization to the implementation of programmes pursuant to EU structural fund requirements;
- the region's promotion and development of programmes and projects at the level of Poland's central authorities, EU Commissions and among potential local and external entrepreneurs interested in investing in innovative enterprises.

A short-term result of the RIS project implementation is the determination of directions for innovative policy and methods of optimisation of regional innovation-supporting infrastructure, in particular in terms of compliance with SME needs. Moreover, the innovation development strategy in Świętokrzyskie assumes several actions whose ultimate goal is the improvement in the region's attractiveness, increase in company competitiveness, improvement of the inhabitants' living standards, educational advancement and minimising the adverse effects of unemployment.

Long-term results of the regional strategy implementation shall be the following:

- Building regional integrity around the creation of an environment conducive to business progress — creation of entrepreneurship clusters as well as new, sustainable workplaces;
- Improving the dynamics of the region's economic development, i.e. increase in innovation and competitiveness ratios, particularly among SMEs, the region's increased attractiveness in terms of domestic and foreign investment location; increase in the region's export potential, development of entrepreneurial culture, open to innovation; co-ordination of various actions taken in the region and aimed at achieving sustainable competitive edge in response to the challenges of information-based economy; reinforcing business infrastructure, financial institutions included;
- Preparing the region for entering EU's internal market and effective absorption of financial transfers for the region from domestic and foreign financing sources;
- Improvement of the voivodeship's economic and social ratios.

The implementation of the Regional Operational Programme for Świętokrzyskie Voivodeship for the years 2007–2013 (part of which is the RIS) is to bring results in the form of building a modern economy in the region, based on know-how and skills, open to innovation and generating new workplaces. Following these tendencies is neces-

sary to achieve economic growth at average EU levels as well as for generating new workplaces.

The Regional Programme assumes the implementation of multifaceted change-oriented actions in the voivodeship's business structure, which currently comprises outdated and inefficient sectors (including agriculture and traditional industries). The building of the modern economy will be aided by improved conditions in all spheres: the infrastructural, the economic and the social. The achievement of the general objective shall occur through the implementation of six specific objectives.

- Objective 1. Increase of the regional economy's competitiveness through increasing investment capacity of businesses;
- Objective 2. Providing conditions for development of information society as well as linkages between the R&D sector and the economy;
- Objective 3. Qualitative enhancement of the region's communications system and its connections with domestic and European transport arteries;
- Objective 4. Improving the quality of the voivodeship's natural heritage;
- Objective 5. Provision of access to quality public services and cultural heritage;
- Objective 6. Attractiveness enhancement of towns and municipal centres.

The value of the Regional Operational Programme for Świętokrzyskie Voivodeship for the years 2007-2013 amounts to EUR 956,357,809.

Investments for business

The nearest years will bring considerable improvement in communications and logistics conditions for companies operating in the voivodeship. The region's main road, i.e. the national road No. 7, shall become an express road as soon as 2011. There are also plans for the national No. 74 to be upgraded to an express road. The Warsaw-Kielce railway line No. 8 shall be renovated so that in the next few years passengers can reach Warsaw in about 1.5 hours. Yet the most essential investment in infrastructure shall be the construction of Kielce Airport.

Many investment projects within the business environment have been planned. The Kielce Technology Incubator will be created. New investment areas in the Special Economic Zone will be developed. A loan and guarantee fund will be established. Dynamic development of the Kielce agglomeration, as planned, shall be of utmost significance to the region and its companies.

Kielce. Visualisation of Kielce Technology Incubator.

Key investment projects in infrastructure:

- KIELCE Regional Airport
- modernisation of Psary – Kozłów – Krakow railway connections (covering Świętokrzyskie and Małopolskie/Little Poland Voivodeships) as well as the railway line No. 8, the Warsaw – Okęcie – Radom – Kielce segment,
- building and expansion of the express road No. 7 between Radom and Jędrzejów,
- building a northern ring road for Jędrzejów within the No. 78 national road,
- the No. 42 national road crossing through Starachowice,
- building a ring road for Wąchock within the No. 42 national road,
- rebuilding the No. 765 regional road, the Chmielnik – Staszów – Osiek segment,
- removing barriers to development: a bridge on the Vistula river, together with the reconstruction of the No. 764 regional road and traffic opening on the Rzeszów – Kielce route,
- building a ring road for Końskie within the No. 728 regional road,
- rebuilding the No. 786 road from the voivodeship limits to Włoszczowa, Łopuszno and Kielce,
- rebuilding the No. 751 Suchedniów – Ostrowiec Świętokrzyski road,

Świętokrzyskie. The region's major challenge is the improvement of roads. A key issue is dual carriageway expansion of the No. 7 road to upgrade it to an express road standard.

including the Nowa Słupia ring road,

- rebuilding the No. 728 Jędrzejów – Końskie regional road,
- Pętla Świętokrzyska roads, Stage II, including the rebuilding of the Wólka Milanowska – Nowa Słupia segment of the regional No. 756 road, the Huta Nowa – Wólka Milanowska segment of the regional No. 753 road, the Krajno I – Święta Katarzyna segment of the regional No. 752 road,
- rebuilding the No. 777 Sandomierz–Zawichost road,
- rebuilding the No. 776 regional road.

Key investment projects in business environment infrastructure:

- establishment of the Regional Science and Technology Centre at Podzamcze Chęcińskie,

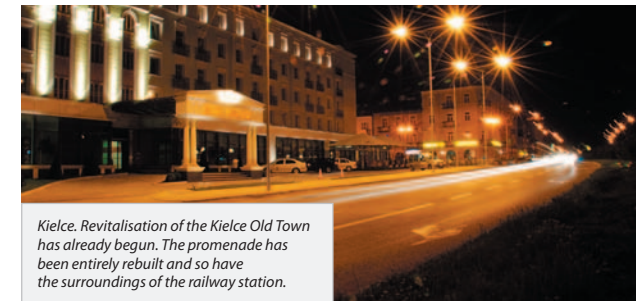

Świętokrzyskie. Urgent maintenance works are needed by some of the already existing dual carriageways.

- establishment of OBRKO Research and Development Centre for Casting Components at Odlewnie Polskie S.A. Company,
- complex development of industrial estates in the Special Economic Zone,
- building of technical infrastructure for future industrial estate in the southern part of the town of Jędrzejów,
- establishment of the centre for education and exchange of European thought in Sandomierz,
- establishment of Kielce Technology Incubator,
- establishment of a loan and guarantee fund.

Key investment projects in Kielce Agglomeration:

- KIELCE Regional Airport.
The scope of the works includes primarily the building of a runway, arrivals and departures hall, cargo terminal and other technical infrastructure,
- Revitalisation of historic centre of the City of Kielce, in particular the reconstruction of the Rynek square and adjacent streets,
- Projects pertaining to transport solutions for the City of Kielce. Building the Żelazna – 1 Maja – Zagnańska Street interchange, together with rebuilding of Herlinga-Grudzińskiego Roundabout; building streets to enable communications services

- in the fair area as well as a multi-storey car park for about 1000 cars; purchase of 50 low-floor buses; building bus terminuses and bays; transport-support electronic systems,
- Kielce Technology Incubator,
- Modernization and expansion of Kielce Trade Fairs as an international exhibition and congress centre.

Kielce. Revitalisation of the Kielce Old Town has already begun. The promenade has been entirely rebuilt and so have the surroundings of the railway station.
